BIE21-008270 E Issued 7/22/2021 \$300.00 To whom it may concern: on May 18th, 2021, a section of the deck of my house caught on fire due to lose wires connected under the deck. The fire was put out immediately and the rest of the entire house was not affected electrically wise. However, for safety purposes PG&E was called to shut off the entire electricidal power of the house. A few contractors inspected the problem and advice me that deck had unnecessary electrical wires that were not being used and recommended to eliminate the extra electrical box and switches that might have originated the fire. Instead of repairing and upgrading unnecessary conduit from the electrical box, because I do not have the means to make repairs that the house does not need. I need an inspection that shows that any extra potential risk of fires is eliminated completely, as the complete section of the electrical wires has been eliminated. PG&E will not restore the power back in my house until inspected by Contra Costa Building Department. I need an inspection as soon as possible please to restore power back in my house. I am a single mother of two toddlers and we are staying in hotels until our house can be restored again. Please contact me to schedule a meeting at your soonest, available appointment. Thank you so much and have a great day!
