City: ALL Inc/Uninc: Unincorporated

BIM22-004928	M	Issued	6/7/2022	\$3,000.00	no propane or natural gas is supplied to house. lock out tag out the electrical and use a meter to verify there is no power to the unit. disconnect electrical from the unit and use a wire nut and electrical tape to secure each wire. disconnect the supply and return plenum from the old unit and remove old propane gas fired furnace from existing central hvac system. install a new 3.5 ton heat pump system in place of original hvac system. connect original supply and return plenum. using foil tape secure all seams so no air escapes into the attic. on a separate concrete pad install the condensing unit and secure unit to pad with Hilti anchors per code. connect original electrical to new unit and verify amp rating on wires and proper fuse sizing is used . install 2 condensate drains from main and overflow drain on fan coil in ceiling to drain out eve to gutter. install new lineset from the fan coil to the condenser located out side on the pad. charge system with nitrogen and soap test braze joints for leaks. if no leaks are found remove the nitrogen and put system on vacuum. allow system to pull a vacuum below 500 microns. once it reaches the proper micron level allow the stored r-410a to fill the system from the condensing unit. due to the lineset run no additional refrigerant is needed. use existing thermostat from old hvac unit to the new unit. once system is properly installed remove lock out tag out from the disconnects and turn on power. perform start up and verify connections electrical and unit is operating as designed.	3000	0311101006	3201 STONE RD	BETHEL ISLAND
